

HiArc 50 Single Station Cells

Bauromat offer a range of mig, tig and plasma single station robot weld cells. These cells can be supplied with a static table, head and tailstock or tilt and turn positioner.

These systems are ideal for low volume or cellular manufacturing. The range also includes the mini mig system that is ideal for small component production.

Special Features

- Various cell sizes based on tool working areas.
- Static tables to customer request.
- Head and tail stocks in various payloads, face plate centres and swing diameters.
- Tilt and turn positioners for ultimate accessibility.
- Choice of robot brand.
- Choice of welding packages.
- Modular guarding with choice of operator protection systems of manual, powered door or electric roller door.
- Options on control systems. Robot control or HMI/PLC control.
- Pallet based systems to minimise installation time.
